SECURITIES AND EXCHANGE COMMISSION  
(Release No. 34-70666; File No. SR-BYX-2013-034)

October 11, 2013

Self-Regulatory Organizations; BATS Y-Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Related to Fees for Use of BATS Y-Exchange, Inc.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on September 30, 2013, BATS Y-Exchange, Inc. (the “Exchange” or “BYX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act<sup>3</sup> and Rule 19b-4(f)(2) thereunder,<sup>4</sup> which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend the fee schedule applicable to Members<sup>5</sup> and non-members of the Exchange pursuant to BYX Rules 15.1(a) and (c). Changes to the fee schedule pursuant to this proposal are effective upon filing.

<sup>5</sup> A Member is any registered broker or dealer that has been admitted to membership in the Exchange.

The text of the proposed rule change is available at the Exchange's website at <http://www.batstrading.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Exchange proposes to modify its fee schedule effective September 30, 2013, in order to amend the way that the Exchange calculates rebates for removing liquidity from and fees for adding liquidity to the Exchange. Specifically, the Exchange is proposing to amend the methodology by which it determines the rebate that it will provide and fee it will charge to Members based on the Exchange's tiered pricing structure by excluding from the calculation of both ADV<sup>6</sup> and average daily TCV<sup>7</sup> any day that trading is not available on the Exchange for more than sixty (60) minutes during regular trading hours (i.e., 9:30 a.m. to 4:00 p.m. Eastern Time) but continues on other markets during such time (an "Exchange Outage").

---

<sup>6</sup> As provided in the fee schedule, "ADV" means average daily volume calculated as the number of shares added or removed, combined, per day on a monthly basis; routed shares are not included in ADV calculation.

<sup>7</sup> As provided in the fee schedule "TCV" means total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.

The Exchange currently offers a tiered structure for determining the rebates that Members receive for executions that remove liquidity from the Exchange and the fees that Members are charged for executions that add liquidity to the Exchange. Under the tiered pricing structure, the Exchange provides different rebates and charges different fees to Members based on a Member's ADV as a percentage of average daily TCV. The Exchange notes that it is not proposing to modify any of the existing rebates or fees or the percentage thresholds at which a Member may qualify for certain rebates and fees pursuant to the tiered pricing structure. Rather, as mentioned above, the Exchange is proposing to modify its fee schedule in order to exclude trading activity occurring on any day that the Exchange experiences an Exchange Outage, defined as an outage lasting for more than sixty (60) minutes, from the calculation of ADV and average daily TCV. The Exchange believes that including trading activity on days when trading on the Exchange is unavailable for a significant portion of the day can unfairly skew the calculation of ADV and TCV. Thus, the Exchange believes that the most accurate and fair implementation of its tiered pricing structure is to exclude from the calculation of ADV and TCV all days where the Exchange experiences an Exchange Outage.

The Exchange believes that eliminating days where the Exchange experiences an Exchange Outage from the definition of ADV and TCV, and thereby eliminating that day from the calculation as it relates to rebates and fees based on trading activity on the Exchange, will help to eliminate significant uncertainty faced by Members as to their monthly ADV as a percentage of average daily TCV and the rebates and fees that this percentage will qualify for, providing Members with an increased certainty as to their monthly cost for trades executed on the Exchange.

The Exchange notes that it recently adopted changes to exclude the last Friday of June from the calculation of ADV and average daily TCV.<sup>8</sup> The last day of June is the day that Russell Investments reconstitutes its family of indexes (“Russell Reconstitution”), resulting in particularly high trading volumes, much of which the Exchange believes derives from market participants who are not generally as active entering the market to rebalance their holdings in-line with the Russell Reconstitution. Similar to the current proposal, the Exchange completely excludes Russell Reconstitution days from the calculation of ADV and average daily TCV.

## 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6 of the Act.<sup>9</sup> Specifically, the Exchange believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,<sup>10</sup> in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and other persons using any facility or system which the Exchange operates or controls. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee structures at a particular venue to be unreasonable and/or excessive.

With respect to the proposed changes to the tiered pricing structure for removing liquidity from the Exchange and adding liquidity to the Exchange, the Exchange believes that its proposal

<sup>9</sup> 15 U.S.C. 78f.

<sup>10</sup> 15 U.S.C. 78f(b)(4).

is reasonable because, as explained above, it will help provide Members with a greater level of certainty as to their level of rebates and costs for trading in any month where the Exchange experiences an Exchange Outage on one or more trading days. The Exchange also believes that its proposal is reasonable because it is not changing the thresholds to become eligible or the dollar value associated with the tiered rebates or fees and, moreover, by eliminating the inclusion of a trading day that would almost certainly lower a Member's ADV as a percentage of average daily TCV, it will make the majority of Members more likely to meet the minimum or higher tier thresholds, which will provide additional incentive to Members to increase their participation on the Exchange in order to meet the next tier. In addition, the Exchange believes that the proposed changes to fees are equitably allocated among Exchange constituents as the methodology for calculating ADV and TCV will apply equally to all Members. While, although unlikely, certain Members may have a higher ADV as a percentage of average daily TCV with their activity included from days where the Exchange has an Exchange Outage, the proposal will make all Members' cost of trading on the Exchange more predictable, regardless of how the proposal affects their ADV as a percentage of average daily TCV.

Volume-based tiers such as the liquidity removing and adding tiers maintained by the Exchange have been widely adopted in the equities markets, and are equitable and not unfairly discriminatory because they are open to all members on an equal basis and provide higher rebates or lower fees that are reasonably related to the value to an exchange's market quality associated with higher levels of market activity, such as higher levels of liquidity provision and introduction of higher volumes of orders into the price and volume discovery process. Accordingly, the Exchange believes that the proposal is equitably allocated and not unfairly discriminatory because it is consistent with the overall goals of enhancing market quality.

Further, the Exchange believes that a tiered pricing model not significantly altered by a day of atypical trading behavior which allows Members to predictably calculate what their costs associated with trading activity on the Exchange will be is reasonable, fair and equitable and not unreasonably discriminatory as it is uniform in application amongst Members and should enable such participants to operate their business without concern of unpredictable and potentially significant changes in expenses.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes will benefit intermarket competition in that they will help the Exchange to continue to incentivize higher levels of liquidity at a tighter spread while providing more stable and predictable costs to its Members. Further, the proposed changes will help to promote intramarket competition by avoiding a penalty to Members for days when trading on the Exchange is unavailable for a significant portion of the day. As stated above, the Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if the deem fee structures to be unreasonable or excessive.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>11</sup> and paragraph (f) of Rule 19b-4 thereunder.<sup>12</sup> At any time within 60 days of the filing of
